

FACULTY OF ENGINEERING AND NATURAL SCIENCES INTERNSHIP OBLIGATION DOCUMENT

Dear Manager,

Istinye University Faculty of Engineering and Natural Sciences has visionary engineering undergraduate programs that dynamically adapt to the conditions of the day. Students in all programs within the faculty receive an education in accordance with industry conditions. Our biggest goal is to produce graduates who will bring solutions to the problems of institutions and organizations in related fields. For this reason, there are compulsory internship studies that our students are responsible for completing, with varying numbers and durations in our undergraduate programs. Detailed information about each of our undergraduate programs regarding compulsory internship is given in the table below.

If you can provide internship opportunities to our students within the scope of your institution's quota, you will both contribute to engineering education in Turkey and have the opportunity to get to know and evaluate an engineer candidate related to your field. In addition, we will have the opportunity to review our undergraduate programs in line with your feedback.

We issue this document for our students who are still responsible for completing their compulsory internship in accordance with their curriculum. I would like to thank you for your interest in our students and would like to state that we will always be pleased to welcome you in our faculty.

Kind regards,

Prof. Dr. Mehmet Alper TUNGA
Dean

Biomedical Engineering	There is one compulsory internship lasting 30 working days.
Chemistry	There is one compulsory internship lasting 30 working days.
Civil Engineering	There are two compulsory internships lasting 20 working days each.
Computer Engineering	There is one compulsory internship lasting 30 working days.
Electrical-Electronics Engineering	There are two compulsory internships lasting 20 working days each.
Industrial Engineering	There are two compulsory internships lasting 20 working days each.
Mechanical Engineering	There are two compulsory internships lasting 20 working days each.
Software Engineering	There is one compulsory internship lasting 30 working days.
