INTERNATIONALIZATION COORDINATION UNITS

ISU | ISTINYE UNIVERSITY | ISTANBUL

Directorate of International Academic Collaborations (Nexus International)

Developing strategic collaborations with universities ranked in the THE/QS Top 500 and leading research institutions; coordinating the processes of sending doctoral students to these institutions and ensures that partnerships are transformed into practical, implementable outcomes.

Website: Click here.

Directorate of Strategic R&D and Resource Development

Supporting the development of externally funded projects within the university in order to participate in international funding programs; facilitating participation in research consortia and global collaboration networks, ensuring that the institution's capacity progresses in alignment with internationalization goals. Also, contributing to the development and recruitment of researcher human resources.

Access: Click here.

Department of International Relations

Ensuring the admission, integration, and support of international students in academic and social processes; coordinating Erasmus+ and similar mobility programs for academic staff and students, thereby strengthening the educational and student experience dimension of institutional internationalization.

Access: Click here.

Department of Information Resources and Library

Facilitating the development of internationally collaborative publications by providing access to international databases, scientific content subscriptions, and research infrastructure support; strengthening researchers' access to global knowledge resources, thereby contributing to the university's research capacity on an international scale.

Access: Click here.

Department of Information Technologies

Providing the digital infrastructure for all processes within the scope of internationalization, enabling data production, monitoring, reporting, and institutional performance tracking; supporting the reliable, accessible, and integrated management of international student, research, and collaboration data, ensuring that internationalization policies are carried out in an integrated manner within institutional digital systems.

Third Five-Year Action Plan & Internationalization Policy

- All processes are monitored, performance indicators are evaluated, and institutional improvements are implemented in order to ensure the achievement of the strategic objectives in the internationalization category of the Third Five-Year Action Plan.

- All internationalization activities are managed, monitored, and reported in accordance with the principles, objectives, and processes defined in the Internationalization Policy.
