

**ISU** | ISTINYE  
UNIVERSITY  
I S T A N B U L

**FACULTY OF  
PHARMACY**

Prof. Abdullah OLGUN  
Faculty of Pharmacy Dean

Our faculty serves for our country and the humanity with the awareness of pioneering roles of the pharmacists who are to be educated here, on the transformation process of the profession by a strong and highly motivated academic staff, highest degree of theoretical and practical education and research infrastructure, provision of internships by hospital chains those are spread around the country, principle of being evidence-based in the processes of administration and decision making.

## WE EDUCATE EIGHT-STAR PHARMACISTS LIVING EVIDENCE-BASED

### PHARMACY (TURKISH) PHARMACY (ENGLISH)

#### Eight-Star Pharmacists Living Evidence-Based of the Future

The sum total of all required qualifications and the competence for a pharmacist is symbolized with eight-star by the World Health Organization (WHO) and the International Pharmaceutical Federation (FIP). Meanings of the eight stars are “caregiver, decision maker, communicative, administrator, lifelong learner, teacher, leader, and researcher” for each. Evidence-based pharmacy is an expectation from pharmacists today and for the future. Faculty of Pharmacy in Istinye University aims to train eight-star and evidence-based pharmacists by its curriculum. Programs both in Turkish and in English are available in the faculty. An intensive general/academic/professional English education similar to the preparation school is provided in the Pharmacy Program that is taught in Turkish. Because it is compulsory in the evidence-based pharmacy to keep track of the sources which are containing the evidences and are written mostly in English. The pharmacists will often be applying to the evidence-based databases in the future.

### PHARMACY IN THE WORLD

Profession of pharmacy has been changing worldwide from drug oriented pharmacy to the drug and patient oriented pharmacy. Our country is following this trend around the world. Ministry of Health has officially started the process of training expert pharmacists in Clinical Pharmacy and Phytopharmacy fields. The first Examination of Speciality in Pharmacy (EUS) was hold in 2017. The leader pharmacists who have the ability to reach the latest valid scientific evidences, to make decisions according to the evidence-based information acquired by using that ability; have the competence to transmit the information by their most effective communication skills to the patients who need the information; and to make them to use the information are the most needed ones by the society and the most demanded ones in the industry.

# PHARMACY AT ISTINYE UNIVERSITY

Our faculty is aware of its leading roles during the transformation process of the profession on the pharmacists who are to be trained. Accordingly, it provides with education and researching by a strong and highly motivated academic staff, highest degree of theoretical and practical education and research infrastructure, provision of internships by hospital chains those are spread around the country, principle of being evidence-based in the processes of administration and decision making to serve for our country and the humanity. Students know how it is, they show, and do. We give to students the opportunities of showing the factory scale production at school, and the industrial production at factory.

## PIONEER PHARMACISTS HAVE BEEN TRAINED AROUND THE WORLD BY THE “EVIDENCE-BASED PHARMACY EDUCATION”

“Broaden Education Program” is prepared by our faculty contains the different elements from the other faculties of pharmacy and at least 70% of that is composed of National Core Education Program (ÇEP). It aims to train pharmacists who will bring our country to the pioneering position on pharmacy and who focus on the required functions and the roles to be taken by pharmacists in the future. It is intended to educate students as the pharmacists doing evidence-based pharmacy by using the evidence-based methods.

## THE PHARMACISTS WHO RESEARCH, DESIGN, AND PRODUCE

The students in our faculty begin to study on the graduation projects by the freshman year. Students focus on any certain problem of the humanity and try to develop solutions within the scope of problem solving, design and production oriented pattern of education by all kinds of support provided them throughout their five-year education. The students who are educated with this mission deepen their researches by getting benefit from the R&D laboratories.

## IT IS TARGETED THAT ALL STUDENTS GRADUATE WITH AN ACADEMIC PUBLICATION AND A PRODUCTION

It is targeted that all students graduate with an academic publication and a production in the Department of Pharmacy at Istinye University. This program which aims to decrease the imported drug dependency of our country pays attention to the collaboration between the industry and the university. It is targeted that the students develop an original molecule and this production is synthesised originally at ISU. The purposes are to develop a product which is prospective to be produced as a drug and to support our country to undertake the leading role in pharmaceutical industry.
