

## SOCIAL SERVICE (TURKISH)

Our department raises competent social workers thanks to its professional academic staff and the content of its contemporary curriculum compatible with Europe. The students will widen their knowledge by theoretical courses and develop their skills by the internships. They will be able to get intensive English courses or learn another language. They have the opportunity to improve their foreign language in a short time period at the universities in Europe free of charge by Erasmus Programs. If they wish they will be able to do their final internships in Germany or receive dual degree in four years as one from our university and the second one from the departments of social services in Germany thanks to the new collaborations to be started soon. Students who do not prefer that will be able to receive dual degree in Turkey by doing double major at our university and improve themselves in different disciplines by doing minor. They will become prominent in their working life by their knowledge on new fields (such as social health and digital social work) that are not studied at other departments in Turkey.

## NURSING (TURKISH)

The students will graduate as knowledgeable nurses who are competent in their fields after they spend their education lives with a strong academic staff who are experts in their fields. We aim to raise qualified nurses by the curriculum made according to National Undergraduate Education Core Program, by Erasmus Program, by the opportunities of doing double major and minor. The students are provided with the facilities for operational education with professional skills, simulation, and basic medical laboratories equipped with advanced technology. The students will find opportunity for practicing at our two university hospitals particularly, at Liv Hospital and Medical Park Hospitals. In addition, academicians who can do scientific researches, can find solutions for professional problems, and have critical thinking skills are raised by the master's and doctor's degree programs.

## NURSING (ENGLISH)

As the Department of Nursing (English) our main purpose is to improve individuals', families', and societies' health regionally and globally by the ways of education of nursing, researching, practicing, perfectionism and leadership in the service. The students will graduate at international academic level with a strong academic staff who are experts in their fields, benefit from the Erasmus Program, have the opportunities of sharing ideas multidisciplinary thanks to the facilities (such as artificial intelligence laboratories, research funds etc) for interprofessional experiences, privileged conditions for study and research which are for the students who are from different cultures and countries by nature of the department, have chance to do double major and minor by getting the nursing education taught 100% in English after completing the preparation course. The students are provided with operational education in professional skills, simulation, and basic medical laboratories which are equipped with advanced technology. The students will find opportunity for clinical practice at our two university hospitals particularly, at Liv Hospital and Medical Park Hospitals.

Prof. Engin ULUKAYA  
Faculty Of Health Sciences Dean

The departments under the Faculty of Health Sciences involve the most needed and promising occupational groups both nationally and worldwide. These professions which provide group works multidisciplinary and interdisciplinary offer many different career options for students. Students graduated from this faculty can take charge in both private and public health institutions as consultants, instructors, and administrators. They can also provide service by setting up their own private clinics or prefer academic career and become academicians. Since the demands for these occupations never end the graduates will be assigned to the their occupations as professionals which are needed ones in their fields.

## WE RAISE PROFESSIONALS WHO CREATE DIFFERENCE IN HEALTH INDUSTRY

The Faculty of Health Sciences in IstinYE University aims to raise modern and knowledgeable health professionals who research, take scientific thinking and scientific application as principles, use technology effectively, internalize the philosophy of lifelong learning, ground their practices on evidence based applications, and are experts in their fields.

## DEEP-SEATED EXPERIENCE AND BACKGROUND

The Faculty of Health Sciences in IstinYE University raises health professionals who create difference with their professional knowledge and skills by benefiting from the knowledge, background, and experiences going back many years of MLP Care Group which is the greatest healthcare brand in Turkey. Well-prepared education plan at the Faculty of Health Sciences are instructed by a distinguished teaching staff.

## PRACTICAL AND THEORETICAL EDUCATIONS

With the intention of transferring theoretical education taught by an experienced academic staff who are experts in their fields into the practice, free internship opportunities for students are provided at "Liv Hospital", "Medical Park", and "VM Medical Park" hospitals which are equipped with the advanced technology. Students who graduated successfully have job opportunities within "MLP Care Group" that combines three separate brands of hospitals those are "Liv Hospital", "Medical Park", and "VM Medical Park" under a single roof.

## DEPARTMENT OF NUTRITION AND DIETETICS (TURKISH)

While the students at Department of Nutrition and Dietetics gain professional knowledge all along their learning period by an acknowledged expert academic staff in their fields they also get the opportunity to take education in a multidisciplinary work environment thanks to the courses those responding to the current demands and involved by our curriculum. Students who provide the suitable conditions have the opportunity to do double major and minor in many departments and to benefit from the Erasmus Program. All of the practice courses in the curriculum are conducted in the laboratories of our department. Students who completed junior year successfully can do internship at many hospitals, particularly at our university hospitals. The dieticians in the future will have the ability to keep up with recent developments and the literature since academic and professional English courses specific for the Department of Nutrition and Dietetics are in the curriculum. Students who enhance their academic skills thanks to all those opportunities can improve their personal development and social awareness within the courses of Manifest of IstinYE and by the activities conducted by the student clubs within the body of our department.

## DEPARTMENT OF CHILD DEVELOPMENT (TURKISH)

The students will graduate as competent and knowledgeable child development specialists through an education life with a strong academic staff. Students can have one year of English education optionally, benefit from the Erasmus Program, and have the opportunity of doing double major and minor by sophomore year. The curriculum is prepared within the criteria of National Child Development Undergraduate Education Core Program and it provides with the opportunities of observation, practice, and internship. The Child Development Atelier within the department is provided students to support them at putting their theoretical information into practice. The atelier contains Development Tracking and Monitoring Unit within itself. In addition the courses of drama, music, science; and the group courses are taught here.

## DEPARTMENT OF SPEECH AND LANGUAGE THERAPY (TURKISH)

The curriculum of the department is prepared within the criteria of National Department of Speech and Language Therapy Undergraduate Education Core Program by academic staff members who are experts in their fields. The curriculum involves 400 hours of clinical observation and practice. By this means the students will have an education life with a strong academic staff and keep up with recent developments about language, speech, voice, and deglutition disorders and therapies for them. They will graduate as competent and knowledgeable language and speech therapists thanks to the medical based education and practice. Students are provided with the broad opportunities to develop themselves academically and medically. They are offered with the chances of becoming knowledgeable language and speech therapists in the field and continuing to the post graduate education.

## DEPARTMENT OF MIDWIFERY (TURKISH)

The students will graduate as competent and knowledgeable midwives through an education life with a strong and professional academic staff. The curriculum of the department is prepared according to National Undergraduate Education Core Program. All students in the department will be able to carry out pregnancy care, birth and postpartum care, and neonatal care individually within the hospitals where they practice. Sophomores and juniors will find opportunity to reinforce what they learned by doing summer internships in the summer period. They will be able to select intensive English courses optionally, have the opportunity to go abroad by Erasmus Program, and do double major and minor by sophomore year. Students who will benefit from the opportunity to take applied education in richly equipped practical laboratories will find opportunities to do internship and clinical practice at two university hospitals particularly and at Live Hospital and Medical Park hospitals. Students who aim academic career will be able to continue postgraduate education as members of IstinYE and to become midwives who are experts in their fields.

## PHYSIOTHERAPY AND REHABILITATION (TURKISH)

Our department with a strong academic staff takes to raise competent and knowledgeable physiotherapists as a mission. The students can learn English at academic level by intensive English courses and they can partially spend their education lives in Europe by Erasmus Programs. Students are provided with opportunity of comprehensive and operative education at international level thanks to the six separate Physiotherapy Operations Laboratories and three separate Basic Medical Laboratories with advanced technology. The students can graduate with dual degree by doing double major and minor as from sophomore year. They have chance to do their summer internships and clinical studies at the university hospitals, particularly at Liv Hospital and Medical Park Hospitals.

## PHYSIOTHERAPY AND REHABILITATION (ENGLISH)

Language of education at the department which has a strong academic staff is English. Our department which takes to raise competent and knowledgeable physiotherapists as a mission has six separate Physiotherapy Operations Laboratories with advanced technology. The students can partially spend their education lives in Europe by Erasmus Programs. Students who are able to graduate can continue to DPT (Doctor of Physical Therapy) program at North Carolina Winston-Salem State University in the US and so they can receive a second diploma (DPT). Students who do double major and minor by their sophomore year can do their clinical studies and summer internships as the parts of their education at the university hospitals, particularly at Liv Hospital and Medical Park Hospitals.
